Portugal Eco Rally

Car competition is changing, both in technology and entertainment. A few years ago, major motorsports championships had ensured spectators and sponsorships without much effort in promotion. It is known that where the audiences are, the attention of the manufacturers is also present, improving the show, and creating a winning spiral.

We do not have to be very observant to realize how much the entertainment industry has changed. New alternatives are constantlyappearingand competing with motorsport events. Formula E is the example of how we should reinvent our sport. An event where, for the first time, there can be a conditioning of the result, with the ability of the fans to interact in real-time using the voteon "FANBOOST".

These are the type of events and innovation that inspire us at Oeiras Eco Rally - Portugal. This year, we will be pioneers again with the inclusion of a "street stage", allowing us to get closer to the public and the potential customers of alternative energy vehicles.

Fortunately, we found the right partner in Oeiras Municipality, presided by Isaltino de Morais, a person who knows the future of sustainable mobility. PRIO also believed in Oeiras Eco Rally - Portugal and didn't hesitate to be a partner in our event, which ends next to its facilities on the beach of Santo Amaro de Oeiras.

Once again, we have our team committed to create a sustainable future leading event! We are here to help creating a better future ... not only for us, but mainly for our children.

Declaration of Environmental Responsibility

Within the scope of the FIA's Environmental Certification System, Classic Clube de Portugal assumes the socio-environmental commitment as organizer of this event, valuing it as a recognized social capital factor as a promoter of integration and social mobility, involving a wide range of partners, organizers, participants, sponsors, media and public. This sporting event is considered a privileged vehicle of information, creating relationships of trust that mobilize individuals in the pursuit of responsibilities and shared goals, in order to reduce the environmental impacts caused by the event.

In doing so, all efforts will be guided by respect for principles:

- Comply with all environmental laws and regulations and other requirements
- Publicize and promote environmental knowledge among the different agents (organization, pilots and all teams involved, and spectators);
- Seek cooperation, partnership and exchange with environmental agents;
- Reduce as far as possible the environmental impact with regard to transport by encouraging the use of public or other transport;
- Prefer, whenever possible, renewable energy sources;
- Continue to implement measures and establish partnerships to increase and improve the selective collection of waste as well as the correct and proper disposal of waste;
- Promote and improve our environmental responsibilities based on structured and planned tasks;
- To minimize the number of documents printed on paper, giving priority to the use and consultation of documents in digital formats;
